

Submission Summary

- Dossier Id: E2E-HUM-NEW-INNOV-AMR-SYNT-0001
- Submission Type: pre_market_authorization
- Review Type: generic
- Applicant: Synthetic Applicant 858
- Product Name: Synthetic Synteromycin Product
- Active Ingredient: synteromycin
- Dosage Form: oral suspension
- Strength: 250 mg/5 mL
- Jurisdiction: Rwanda
- Review Pathway: standard

Administrative Review Outcome

- Status: administratively_complete
- No administrative violations were detected from the available dossier evidence.

Dossier Structure Review Outcome

- Status: mapped
- No structural dossier violations were detected.

Applicable Rules And Requirements

- Administrative completeness checklist
- Structural dossier completeness rules
- WHO INN similarity rule
- Section adequacy and evidence sufficiency rules
- Generic review packaging and patient-information comparison against innovator reference when provided
- WHO AWaRe stewardship rules

WHO INN Similarity Review

- Proposed Name: Synthetic Synteromycin Product
- Who Inn: synteromycin
- Similarity Index: 0.4286
- Threshold: 0.7
- Threshold Result: passed
- Similarity Type: orthographic
- Interpretation: Product name 'Synthetic Synteromycin Product' has 42.86% similarity to INN 'synteromycin'. Rule result: pass.
- Flag Status: acceptable_naming
- Rule Consequence: No blocking INN naming issue was identified.

Section-By-Section Technical Review

Generic Review-Specific Assessment

- Status: partial
- Baseline available: Yes
- Baseline reference: synteromycin reference
- Note: Generic workflow requires comparison of packaging and patient information against innovator reference material when p
- Note: Generic baseline comparison used synteromycin reference through MCP patient-information tools with overall alignment
- Note: Example comparison classified the section as partially_compliant.
